SPECIMEN INFORMATION
<p>The adequacy of testing/stains is verified by appropriate positive and negative controls. Unless otherwise specified, the reagents used for the flow cytometry, FISH, immunohistochemistry, color in-situ hybridization and molecular assays are analyte specific reagents (ASR). Their performance characteristics have been validated by siParadigm diagnostic informatics, LLC, Pine Brook, NJ. They have not been reviewed by the FDA. The FDA has deemed that such approval is unwarranted. These assays are for clinical use and should not be viewed as experimental or for "research use only". These tests should not be used for diagnosis without confirmation by other medically established means. This laboratory is certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA-88) as qualified to perform high complexity clinical testing.</p>
